

## MedView™ Imaging Software

Developed for physicians, MedView, streamlines the reading process by providing specialized 3D-display tools for both Nuclear Medicine and PET.

### Easy to Use:

- > Predefined layouts, protocols and on-line help
- > Features designed for both novice and expert users
- > Simple to export as Interfile, AVI (for PowerPoint™) for clinical demonstrations, educational programs or consultations

### Workflow Oriented:

- > After hours, centralized, remote reading for fast report turn around time
- > Create DICOM CDs with MedView on board for referring physicians or patients
- > Access to all PACS stored data, allowing you to display multiple modalities
- > Compare scans with past studies

### Tools You Need:

- > Choose from several tomographic formats or customize one
- > Merge and normalize cardiac stress and rest into one synchronized display
- > All views of a multi-gated study are loaded in a synchronized cine mode
- > Show beating time bins or step through the bins one at a time
- > Modality and cardiac specific color tables
